

## Mid Atlantic Biosolids Association – Call for Presentations 2022 Summer Technical Symposium

**“Biosolids Quality: New Source Control, Upgraded Treatment and New Thermal Processes”**

**Wed., July 20 - Thurs., July 21, 2022**

**Location TBD**

### ***Suggested topics:***

- ***Tracking down PFAS and unregulated organic micropollutants***
- ***EPA’s new risk-based assessment of pollutants***
- ***Defining biosolids products for consumer acceptance***
- ***Controlling microplastics in influent and biosolids***
- ***Advances in solids screening***
- ***Achieving good quality with advanced stabilization, digestion, and post-treatment***
- ***New thermal processes: drying, HTL, gasification biochar***
- ***Instrumentation and automation to optimize biosolids processing for good quality***
- ***Balancing nutrients in biosolids through phosphorus extraction and nitrogen retention***
- ***Processing biosolids with biopolymers and bioplastics in mind***
- ***Protecting biosolids with good storage and handling.***
- ***Fit for Purpose: Manufacturing soils with biosolids***

Email your abstract (approximately 500 words) name, affiliation, and short bio to Howard Matteson, Symposium Chair, at [mattesonhs@cdmsmith.com](mailto:mattesonhs@cdmsmith.com) by February 11, 2022

*Contact us at 845-901-7905 for corporate sponsorships and technology introduction opportunities!*

# Are you a member?

Organizations that join MABA can provide their employees with:

- Monthly news clippings of biosolids articles from around the world
- Monthly biosolids science reports
- Updates on current topics in the profession
- Convenient access to all important federal and state documents pertaining to biosolids
- More than a hundred presentations from conferences
- Network of colleagues from public agencies, academia, service companies, regulatory agencies, and equipment suppliers.
