

## Mission

The Mid-Atlantic Biosolids Association (MABA) is a professional organization comprised of government agencies, non-governmental organizations, academics, regulators, technologists, and service providers committed to the optimal management of biosolids in the Mid-Atlantic region.

## MABA Membership

Each member organization selects an individual to represent it in the association's committees and leadership, but every employee has full privileges and benefits of membership. All membership applications must be submitted for the highest category for which the organization is qualified, in accordance with the descriptions on the following page, and as may be determined by the Board.

**Research &  
Knowledge**

**Facilitated  
Networking**

**Communication &  
Advocacy**

# How Can MABA Benefit You?

## Research & Knowledge

In addition to aggregating existing research, MABA will target primary research toward the issues and topics most relevant for the biosolids industry. Members enjoy access to the latest in biosolids research from the top peer reviewed journals and from proceedings of national and regional conferences; summaries and abstracts are available, and full papers are provided by MABA staff. MABA has developed strategic relationships that address new scientific issues in collaboration with a variety of funding sources.

## Facilitated Networking

MABA seminars and technical conferences enable industry stakeholders to share technical information and expand their professional networks. By attending or presenting at MABA special events, members have an opportunity to engage with their colleagues and stay current on the latest technologies and scientific findings. In addition to periodic events, members have access to a special section on the website, a virtual meeting area for posing questions and getting solutions.

## Communication & Advocacy

MABA is an advocate for biosolids, providing its members with a voice in the media and at the negotiating table when it comes time to inform the legislative and regulatory authorities. MABA is the industry advocate when local issues arise or when criticism comes unexpectedly, making an effort to proactively tell the stories of successful recycling and innovative environmental management programs.

## Education & Training

MABA is the organization committed to land application training. MABA is developing a comprehensive program for training field workers and supervisors to meet the highest standards of professionalism. The MABA training program is designed to deal with all aspects of job performance, not just regulatory compliance, so it will address some of the science and math behind the important decisions on land treatment of biosolids.

## MEMBERSHIP DUES STRUCTURE

### Public Agencies

(based on annual solids production in dry tons per year)

Large (>1,500) \$1,000

Medium (391– 1,500) \$500.00

Small (<390) \$200.00

### Business

(based on total number of total organization employees in the MABA region)

Large (50+) \$1,000

Medium (11–50) \$500.00

Small (<10) \$200.00

### Alliance Membership

(agriculture/environmental organizations)

\$200.00

### Individual Membership

(no organization membership)

\$50.00
